Elastomeric Ligature Ties

- Low profile fits under bracket tie wings to avoid irritating the gingiva
- Individual Ties – Configured to help eliminate cross contamination
- Mini Ties – Allow the use of a unique color on each arch, without contamination issues or waste
- Choose from 61 colors

Available in BULK PACKS!

Tuff Chain™ Elastomeric Chain
- Chain available in 62 colors
- Spool color can match chain color or be clear
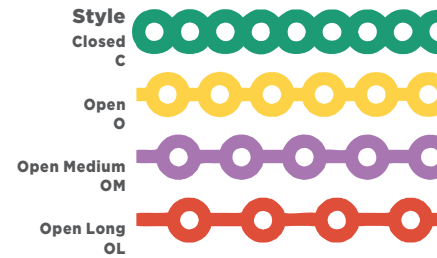

Ultra Tuff™ Elastomeric Chain
- .020" thickness provides clearance for tying chain on top of ligature ties and piggybacking with other force systems
- Spool color matches chain color

Thin Chain Elastomeric Chain
- Perfect for lingual treatment, self ligating brackets and overall patient comfort
- .015" thickness for easy placement and piggybacking over other appliances; Ligates easily over tie wings and self ligating brackets

OS-2	**SS2**	**OS-1**
10 per dispenser; 100 dispensers per bag		70 per dispenser; 15 dispensers per bag
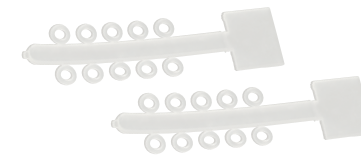

Clear Anterior Separators

- Thin for easy insertion; .054"-.055" thickness; .080"-.082" inner diameter; .190"-.192" outer diameter
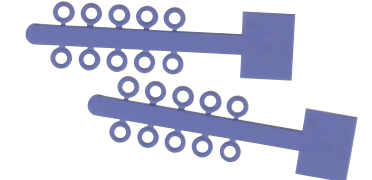

10 per dispenser; 50 dispensers per pack	**OS-2GCA**

Jumbo Separators

- Use for correcting partial molar impaction
- 2mm thickness and 6mm diameter allows maximum extension and memory

4 per dispenser; 32 dispensers per pack	**OS-2XL**

Resep™ Extra Large Posterior Separators

- Great for hard-to-separate cases, or for when appliances such as a palatal expanders are used
- Flat sides and round corners for easy insertion

10 per dispenser; 50 dispensers per pack	**RS-2**

Stainless Steel Wire

- Smooth surface for reduced friction
- Heat treated to help prevent corrosion
- Laser etched midline mark

Weldable Lingual Sheaths

- Designed for use with quad helixes and palatal bars
- .036" slotted and horizontal with latching indent
- Fits .072" x .036" appliances
- Stainless steel
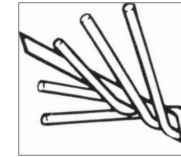

| 4 per pack | **LS36** |
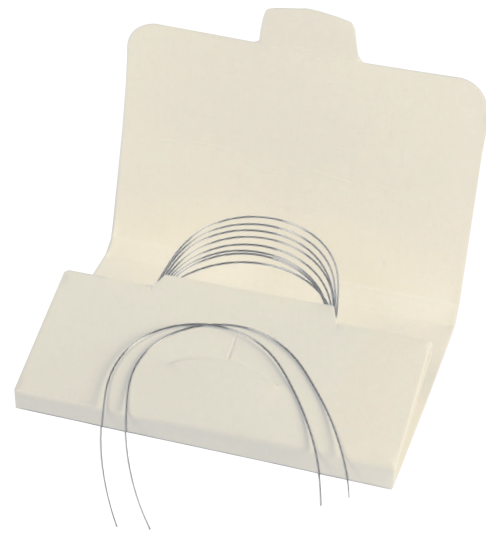

Wire

Nickel Titanium Marsenol Archwire

- Nickel titanium alloy uses shape memory effect and is more elastic than stainless steel
- Delivers consistent force over a long period of time
- Exhibits a high load deflection characteristic when displaced over a short distance
- Smooth polished surface with laser-etched midline mark

Nickel Titanium Marsenol Archwire Thermal

- Heat-activated nickel titanium wire accepts a bend, then slowly returns to its original shape when placed intraorally and elevated to mouth temperature
- Smooth polished surface with laser-etched midline mark

3 springs per pack

Super Three Strand Twist Wire

- Ideal initial archwire provides gentle force
- Will not unravel when cut
- Loops can be formed

Size	15" Straight Length
.0155"	TSS015
.0175"	TSS175
.0195"	TSS195
	10 per box

Super Smooth Cable Wire

- Five strands are wrapped around a core wire
- Excellent first wire – gentle and easy to tie
- Excellent for unraveling and leveling teeth
- Great resiliency and smooth surface reduces friction
- Will not fray when cut

Size	14" Straight Length
.0155"	UCWS015
.0175"	UCWS175
.0195"	—
	10 per tube

Archwire Markers

- Disposable markers help prevent cross contamination
- Thick wax tips of sturdy dowels provide precise marking, high visibility, and superior adhesion

100 Archwire Markers	AWM-1

Archwire Holder

- Convenient chairside dispenser
- Holds 6 sizes of wire in both upper and lower forms; 12 slots total
- Ample room for labels next to each slot
- Stainless steel
- 7.875" long

AWH-N

Closed

Open
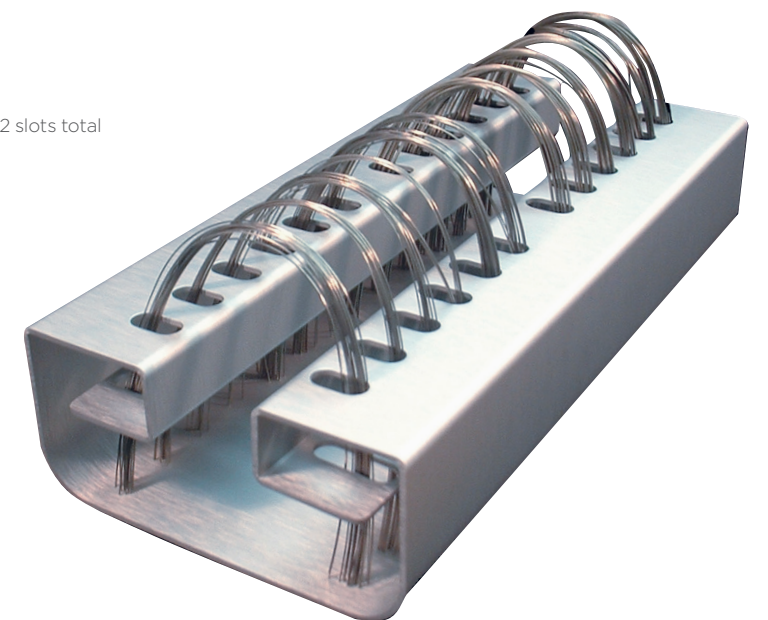

No Light Bonding Bracket Tray

- Excellent for storing one complete set of brackets, second bicuspid to second bicuspid, upper and lower
- Smooth sliding removable top for easy access
- No light trays allow pre-loading of light-activated adhesives for storage until needed

Brackets

Clear Composite Brackets

- Smaller size gives a better appearance, without loss of wings and rotational control
- Rounded everywhere for patient comfort and less chance of breakage
- Continuous slot helps eliminate trapped food and adds strength
- Non-polycarbonate plastic resists staining and water absorption for longer life
- Bottom locking ridges allow use of color-stable adhesive without a plastic primer

Before   After

Thermobite Bite Registration Wafers

- Specially-formulated resin provides highly accurate bite impressions of teeth and horizontal molar area
- Heat according to instructions, bite down, and trim
- Minor perforations allowed, for a correct occlusion with touching teeth surfaces
- Easy to store and transport to labs; resistant to temperature changes during transit

30 per pack	**TB-30**
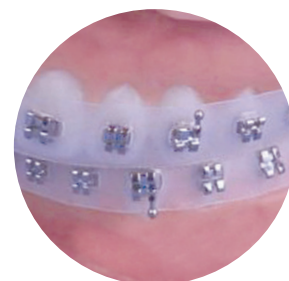

Impression Guards

- Take impressions without removing archwire
- Thin elastomer strip fits over brackets, keeping impression material from getting behind bracket tie wings
- Impression can be removed easily with minimal damage
- Each strip fits one full arch, and can be trimmed for patients who are not fully bonded
- Individually wrapped to prevent patient cross contamination

50 per box	**IMP-100**

Plastic

The Right Plastic for Each Application

Clarity, thickness, strength, aesthetics and specific application are all important things to consider when selecting thermoforming materials. This side-by-side comparison chart can help you select the right plastic for the right application.

	Duraclear™ Plastic	Duraforce™ Plastic	Duraguard™ Plastic
Bondable to acrylic	X		
Creating clear retainers	X	X	
Creating thin retainers for better patient comfort and compliance	X	X	
Creating temporary retainers	X	X	
Creating tooth movement aligners	X	X	
Creating bruxism splints		X	X
Creating customized sports mouthguards			X
Creating temporary bridges	X	X	
Creating bite planes	X		
Creating whitening trays			X
Available in round and square sizes	X	X	X
Available in colors			X
Not make with natural rubber latex or BPA	X	X	X

Duraclear™ Plastic

- Use for retainers, tooth movement aligners and temporary anterior bridges
- Good combination of strength, durability and clarity
- Durable; resistant to cracking, bending out of shape or breaking
- Bondable to acrylic; store in a cool, dry place

Thickness	5" Square	125mm Circle	Quantity
.030" / 3/4mm	DCS030X20S	DCS030X20R	20 per box
.040" / 1mm	DCS040X20S	DCS040X20R	20 per box
.060" / 11/2mm	DCS060X10S	DCS060X10R	10 per bag
.080" / 2mm	DCS080X10S	DCS080X10R	10 per bag

Duraforce™ Plastic

- Average life: 24 months
- Use for bruxism splints, retainers, temporary bridges and tooth movement aligners
- Conforms to model when heated with minimal shrink
- Extremely durable; resistant to cracking or breaking
- Not for use with acrylics/bonding agents
- Store in a cool, dry place

Thickness	5" Square	125mm Circle	Quantity
.030" / ¾mm	DFS030X100S	DFS030X100R	100 per box
	DFS030X10S	DFS030X10R	10 per bag
.040" / 1mm	DFS040X100S	DFS040X100R	100 per box
	DFS040X10S	DFS040X10R	10 per bag
.060" / 1½mm	DFS060X50S	DFS060X50R	50 per box

Duraguard™ Plastic

- Use for custom sports mouthguards and soft splints
- .040" thickness is good for creating whitening trays
- Durable EVA material forms soft and flexible, with great conformity to model
- Offer patients their favorite team colors
- Store in cool, dry place

Thickness	5" Square	125mm Circle
.040" / 1mm	DGS(color)040X25S	DGS(color)040X25R
